

CNH – Internship/Thesis R&D Zedelgem

JOIN

Looking for an internship/thesis?

At CNH we offer a unique experience within our R&D departments for both internships and final projects, in this you can join a team working around:

- Software / Automation
- Mechanics
- Field Testing / Validation
- Hydraulics
- Drives
- Electronics
- Simulation

What will you do?

As a student at CNH, you will participate in research and analysis, design and development of prototypes, and conducting tests and validations. You will participate in team meetings, prepare presentations, and support senior engineers on technical issues. You will also help plan and coordinate project activities and document your findings and processes.

What will you get in return?

As a student, you will have the opportunity to develop your talents in an educational and dynamic work environment focused on innovation, technology and sustainability.

At CNH we like to focus on young talent because we are convinced that both we and the student can learn a lot from each other and who knows, maybe you will join our team afterwards! So don't hesitate to apply!

What kind of profile are we looking for?

You are a motivated and inquisitive student with a passion for technology and innovation. For this internship, we are looking for someone who meets the following criteria:

Study Subject: Bachelor's or Master's degree in Mechanical Engineering, Electrical Engineering, Computer Science, Automation, Mechatronics, or similar.

Technical Skills: Basic knowledge of relevant software and tools (e.g., CAD, programming languages, simulation software).

Skills: Strong analytical and problem-solving skills, good communication skills in Dutch and/or English, and a proactive attitude.

Personal Attributes: Team player, independent, flexible, and with a professional work ethic.

Area of Interest: Affinity with one or more of our R&D departments such as Software/Automation, Mechanics, Field Testing/Validation, Hydraulics, Drives, Electronics, or Simulation.

We appreciate previous internship experience or participation in technical projects, but this is not a requirement. If

you recognize yourself in this profile, we would like to invite you to apply.

What does the application process look like?

1. Fill out your information through this job posting.
2. One of our staff members will contact you to answer any questions and schedule an interview.
3. The interview will take place online or physically.
4. After the interview, we will present a possible topic that fits your profile.
5. If the topic is approved, your adventure at CNH begins!
