

CNH – Supervisor Quality Components

JOIN

what does the role entail?

You will lead the inspection, measurement, and Parts Quality Engineering teams. You will monitor part quality, support new product launches through PPAP, and ensure that ISO 9001 processes are followed correctly. Your role has a direct impact on quality, production continuity, and the performance of our suppliers.

Responsibilities:

- Lead the inspection, measurement, and Parts Quality Engineering teams
- Responsible for PPAP and reporting to the launch team
- Monitoring supplier quality, including escalations and problem-solving
- Recovering costs for non-conforming parts from suppliers
- Managing departmental budgets and time tracking
- Monitoring ISO 9001 compliance and preparing for internal and external audits
- Daily management of Parts Quality Engineers and team leaders across all inspection zones

Who are we looking for?

Required experience:

- Master's degree in engineering, or a Bachelor's degree with extensive relevant experience
- Strong analytical skills, with experience in root cause analysis and risk assessment
- Familiar with ISO 9001, PPAP, audits, and general quality processes
- Leadership experience and the ability to communicate effectively with various stakeholders
- Fluency in Dutch and English

Nice-to-haves:

- ISO 9001 Internal Auditor certification is a plus
- Experience in supplier quality and cost recovery from suppliers
- Experience in quality management within a manufacturing environment

What do we offer you?

- Working at CNH Industrial means working in an environment that offers numerous opportunities for professional growth, thanks in part to its international nature. The CNH Industrial Belgium facility in Zedelgem employs more than 2,500 people. This single location houses a variety of departments, ranging from design—with an R&D center employing over 400 people—to production, dealer service and training, and all support departments.
- CNH Industrial Belgium in Zedelgem is also located in a traffic-free area and is easily accessible.
- We offer a very attractive compensation package, with numerous fringe benefits, such as our bonus system,

insurance, eco-vouchers, meal vouchers, and no fewer than 20.5 days of reduced working hours in addition to the statutory vacation days (for full-time employees).

Are you as passionate as our people? Do you want to join a great team and help build the most innovative and largest agricultural machines on the market? Then apply now!
